for crypto lovers is on your way

Executive Summary

At its heart, blockchain is a self-sustaining, peer-to-peer database technology for managing and recording transactions with no central bank or clearinghouse involvement.

Hybrid intelligence is the combination of human intelligence and machine learning, and their interaction in setting numerous tasks. One sort of intelligence supplements the other.

According to Elon Musk, in one of his interviews, human and artificial intelligence will soon combine to create a new form of interface. This will help humans solve one of the most complex tasks facing humanity.

Some Challenges of Present Cryptocurrencies

Obviously, one may face many difficulties during the dynamic decision-making process. Hybrid intelligence and the other related systems are appropriately under developed for resolving such kinds of challenges.

This is not simply because of speed in decision-making, to be specific, the questions of why one should waste energy on simple assignments that can be settled by both individuals and simple mathematical methods and algorithms.

It is also associated with the complexity of the level of uncertainty and tasks in the system used to resolve them.

"RAGS- An Effective Asset Management"

- RAGS is a Crypto token used as a trading tool that uses artificial intelligence and human input from professional analysis for asset management and financial analytics.
- Under RAG's system, analysts monetize their intellectual efforts, market analysis, and financial predictions by contributing to the ecosystem.
- RAGS fuses together machine learning(ML) and market analysis for asset management and financial analytics
- RAGS's ecosystem consists of professional financial analysts with expertise that spans across currency, stock, and Cryptocurrency markets.

Our Vision

To develop a completely decentralized platform where analysts monetize their intellectual efforts, market analysis and financial predictions by contributing to the ecosystem through their most thought-out, accurate forecasts.

- Forecasters
- Analysis
- Scientists
- Token Holders
- Citizens

Technology Infrastructure

Technological Infrastructure

The Raps technological infrastructure is already developed at the time of the token sale and consists of the subsequent modules. Business logic modules:

- Backend system with basic business logic that works with events;
 - Body system;
 - Viewing information and indicators;
 - Internet application underneath development. Prediction module;
 - Information acquisition;
 - Filtration and improvement of non-inheritable data;
 - Feature extraction;
 - Forming of hypotheses and mathematical models;
-
- Validation and optimization of parameters for prognostic models;
 - Synthesis of correct predictions;
 - Information acquisition from the predictive module;
 - Integration with exchanges, acquisition and process of ensuring data;
 - Back tests and forward tests for parameters of commerce ways;
 - Implementation of trading strategies through trading robots.

RAGS Information

Token Name
RAGCOIN

Type
BEP20

Ticker Symbol
RAGS Coin

Accepting
BTC, ETH, TRON, polygon

Type
Utility

Total Supply
100 Billion

Price
USD 0.36

The merchant address will be provided where you can deposit your ETH, BTC, TRON, Polygon, Your deposit amount will be visible in your wallet after that you can buy RAG currency through your balance.

Go-To-Market Strategy

- Developing a crypto exchange platform is merely the beginning; the next step is to devise a plan to promote your platform.
- Investing in Google Ads and paid social media marketing could help you attract a broader audience base.
- Also, you must not overlook the significant benefits of traditional marketing. Market the unique features and facilities to establish a hype around your crypto exchange.

Go-To-Market Strategy

- The crypto exchange market is red-hot and becoming fiercely competitive with each passing fiscal year.
- Many new crypto exchanges are taking a plunge into this space and establishing themselves to be the best in the industry. It is a no-brainer to conduct comprehensive market research and dig in to garner as much information about your market rivals.
- Figure out the factors that make you the best and what you can do to improve.
- Provide tools and features such as real-time pricing and various cryptocurrencies to help people make a successful investment.
- You could include a feature that becomes the Unique Value Proposition of crypto exchange.

OUR CUSTOMER'S PROBLEM

- The world is moving at a fast pace. Our customers are Africa based startups who want to improve the way things are done in their industry with the use of blockchain technology.
- The problem is they lack sufficient funding.
- Creating their tokens and having them listed on an exchange will help them raise funds for their projects. In doing this, they face issues like:
 - Unaffordable listing prices
 - Prejudice. Africa-based projects face powerful resistance when they attempt to get their products tokenized
 - Our customers are who want to make trans-border transactions with cryptocurrencies, hedge their funds against inflation, or increase their wealth by trading cryptocurrencies.

They face problems like:

- Anti-cryptocurrency laws
- Lack of trust in government and national digital currencies
- Limit on daily remittance transactions
